FRONTEND DEVELOPER

An ambitious Javascript Developer with understanding of HTML, CSS, and JavaScript. Experienced with Frontend frameworks like ReactJS/NextJS looking to use technical expertise and creativity to create compelling user experiences and advance in a professional career. Attempting to employ efficient debugging, code optimization, and project collaboration tools to create apps that surpass user expectations.

EXPERIENCE

Junior Frontend developer, Gitit Tech Limited

JUNE 2023 – AUGUST 2023   Abuja, Nigeria

Junior Frontend developer, Syrys Investment Limited (Remote)

DECEMBER 2023 – MARCH 2024   Abuja, Nigeria

Frontend developer, Moneywise International

JUNE 2024 – PRESENT   Abuja, Nigeria

Achievements:

- Building an EDMS app with a team of developers which allow the user to manage documents, pay for storage plans for the documents, and backup deleted documents.
- Built a Landing Page for a Law firm, displaying what their company is all about, thereby boosting patronage in the firm.
- Built an E-commerce web app called Raw beauty, where users can order for skin care products according to their skin types.
- Built a real estate renting/purchasing web app where clients can buy apartment and rent apartment.
- Built an investment web app for moneywise from scratch, I also got to figure out somethings on my own which has added to my knowledge. Also, I'm the one currently managing the web app up until I'm ready to quit working for them.

Personal Projects

- Cloned Medium.com to a point where it looks similar, not having all features, but almost all the features in medium for a user to login, signup, create a blog, comment on a blog, and delete a blog using Nextjs, React query, Firebase, React redux and Tailwind CSS.
- Built my Portfolio that tells more about myself, and showcase my work done.
- Built a Landing page called Cartify. Build with NextJs and Tailwind CSS. I intend to add more features though.
- Built a Landing Page from https://frontendmentor.com using just HTML and CSS.
- Built an Intro-section Landing Page from https://frontendmentor.com
- Built an interactive rating Page. Its a mini project built with just HTML and CSS.
- Built a landing page for a video meeting app that I'm currently building, though I'm not done with it, I'm currently trying to find my way around building a backend for it to store user's data and enable video calls using web socket and webRTC.

SKILLS AND COMPETENCIES

- HTML/CSS
- Javascript
- ReactJS
- React Redux
- Tailwind CSS
- NextJS
- Git
- Github
- React Query

- PHP Laravel (Basics for now)
- Axios
- Responsive webpages
- Ability to meet up with time
- Ability to collaborate with cross-functional teams
- Clean, efficient, and maintainable code.
- Good communication skills
- Strong problem-solving skills
- Excellent Communication and teamwork abilities
