

DAVIES PRECIOUS

FRONTEND WEB ENGINEER

+234 8157265060 | preshydave.d5@gmail.com | <https://davies-dev.vercel.app> | <https://github.com/preshstiks>

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building scalable, responsive web applications using React.js, Next.js, and TypeScript. I translate complex UI/UX designs into clean, maintainable code while ensuring smooth real-world performance. I bring project management awareness from team environments, helping align development work with product goals and timelines. I've worked with designers, backend engineers, and product teams in agile setups, solving UI issues, API challenges, and performance bottlenecks across fintech, real estate, and enterprise products.

CORE SKILLS

- React.js
- Next.js
- Typescript
- Javascript
- TailwindCSS
- Express.js
- Node.js
- Git/Github
- API Integration
- Responsive design
- Debugging
- Version Control

PROFESSIONAL EXPERIENCE

Moneywise International – Frontend Engineer

June 2024 – July 2025

- Supported early-stage product development by troubleshooting UI issues and refining feature behaviour.
- Identified and fixed critical frontend bugs during development of a fintech investment platform (Affluence).
- Improved performance and responsiveness of user-facing features through iterative debugging and optimization.
- Assisted in bridging gaps between design, backend logic, and frontend implementation in a fast-paced team environment.

Syrys Investment Limited – Frontend Engineer

Dec 2023 – Mar 2024

- Resolved multiple UI/UX and layout inconsistencies while developing a real estate renting and purchasing platform.
- Debugged API-related issues affecting data rendering and user interactions.

- Converted complex Figma designs into responsive interfaces while solving cross-device compatibility issues.

Gitit Tech Limited – Frontend Developer

June 2023 – Aug 2023

- Solved complex UI consistency and responsiveness issues while building a full-scale Electronic Document Management System (EDMS) using Next.js.
- Improved user experience by identifying and resolving usability gaps in core workflows.
- Translated product requirements and UI/UX designs into functional components while resolving edge-case UI behaviour across devices.

EDUCATION

Bachelor of Technology (B.Tech) — Project Management

Federal University of Technology, Minna

2016–2023
